**Ira Ehrenpreis**, *General Partner at Technology Partners and Past Chairman of the Energy Tech Investor Conference*, will be speaking on the panel session "**State of the Industry: Challenges, Opportunities & Outlook**" addressing such concerns as Implications of the 2005 Energy Policy Act; Opportunities Today for Investors; Where the Market for Energy Technology IPO is Heading; and Opportunities for M&A Play in Energy Tech Companies.

Clean technology is not only changing our world, but also the venture investment landscape as we know it and could be the largest economic opportunity of the 21st century. Demand for efficient, clean and reliable energy in its many forms is responsible for creating opportunities across a variety of global economic sectors.

Now in its 3rd year, this premier event will bring together an illustrious faculty of leading corporate and strategic buyers from the energy technology community to share their perspective on investment opportunities, challenges and critical issues facing the industry today!

Program highlights include:

- Clean Technology – What does all the hype mean to the sector?
- Energy Efficiency: Balancing environment and business requirements
- Investing in Cleantech Fund: The LP's perspective
- Cleantech, Nano-materials & Biotech convergence
- Energy tech in the Labs and State Programs: Getting breakthrough technologies out
- Fossil and Nuclear Based Fuels – Are there investment opportunities for ventures investors that aren't considered green?
- Public markets and IPOs - Exits in Renewable and Alternative energy space
- Green trading – Where is it today, what is the reality and where is it going?
- Moving Biofuels forward - Opportunities, research, funding
- Fuel cells – Finding the early markets
