## ***APX Brings Complete Coverage to North American Renewable Energy Markets***

*North American Renewables Registry™ Open for Business*

HOBOKEN, N.J.--([BUSINESS WIRE](#))--APX Inc., the leading infrastructure provider for environmental and energy markets, today announced that the North American Renewables Registry is now available for registration and project use. APX market infrastructure solutions now provide complete coverage across North American voluntary and compliance markets for renewable energy – all with the highest level of integrity.

For facilities and regions such as the Southeast that are not covered by one of the existing APX market systems (NEPOOL-GIS, PJM-GATS, Texas RECs, M-RETS, and WREGIS), the North American Renewables Registry provides an easy-to-use, web-based platform trusted to create, track, manage and retire renewable energy certificates (RECs). For states that are considering a compliance REC tracking and management mechanism, the Registry tracks renewable energy generation and enables compliance with mandatory state and provincial renewable portfolio standards (RPS) and objectives.

“Whether you are a supplier, buyer, investor, or otherwise involved in the renewable energy markets, trust and transparency are critical to your business,” said Brian Storms, Chairman and CEO, APX, Inc. “With the North American Renewables Registry, all participants in the renewable energy markets - regardless of location - are now able to take advantage of a trusted infrastructure to help manage their role in the market.”

APX delivers a robust suite of solutions to enable REC market transactions including issuance and tracking of certificates, a full audit trail and 24/7 support. From corporations and retailers to clean generators and utilities, the Registry ensures transparency, quality, security, accountability and protection against double counting.
