

## Sensors' Top 50 Products of 2006

Nov 1, 2006

By: [Melanie Martella](#)

Sensors

# sensors

We see a lot of new products over the course of a year, in a variety of venues. From all the new products we heard about in 2006, here's our selection of those that we found the most interesting. You'll find a brief description of the product and some comments on what qualities attracted our attention. If your interest is piqued, please check out the online version of this article, which provides links to the vendors mentioned.

### Water Quality Analyzer

The WaterPOINT 870 from **Sensicore**, Ann Arbor, MI, uses a lab-on-chip system to measure 14 water quality parameters on a single test sample in 4 min. (877-528-6333, [sales@sensicore.com](mailto:sales@sensicore.com), [www.sensicore.com](http://www.sensicore.com))

*The ability to measure so many water quality parameters quickly and easily is very slick indeed. —MM*
